Education

National Institute of Technology, Rourkela **August 2023 – Present**

Bachelor of Technology in Computer Science and Engineering (CGPA - 7.96) *Rourkela, Odisha*

Relevant Coursework

- Data Structures and Algorithms
- Machine Learning
- Object Oriented Programming
- Operating System
- Database Management
- Computer Networks

Work Experience

Akamai Technologies **June 2026 – August 2026**

Software Engineer Intern *Bengaluru, Karnataka*

- Developed an **AI powered engineering automation agent** using GitHub Copilot Agent Mode and MCP to automate TLS CryptoServer workflows, including sandbox creation, code analysis, compilation, testing and pull request generation
- Designed and implemented **Python-based automation scripts** and workflow state management to streamline engineering operations, reducing manual effort and improving workflow consistency.
- Investigated and resolved Mythos reported security findings in the TLS CryptoServer codebase through root cause analysis and code fixes.
- Verified fixes through functional and regression testing using assigned test suites, ensuring successful issue resolution without introducing regressions.

Projects

AI Learning Path Generator **August 2026 – Present**

Python, React.js, Flask, LangChain, ChromaDB, Sentence Transformers, PostgreSQL, Redis/RQ *GitHub*

- Built an **AI powered personalized learning platform** that generates structured learning paths, milestones, and curated resources based on a user's topic, expertise level, learning goals, learning style, and available time.
- Implemented a **RAG based semantic retrieval pipeline** using LangChain, Sentence Transformers, ChromaDB, and Perplexity to retrieve relevant learning resources and provide context-aware recommendations tailored to individual learning requirements.
- Developed a **React.js and Flask full stack application** with PostgreSQL authentication and persistent learning data, Redis/RQ background processing, progress tracking, resource recommendations, and an interactive learning assistant.

SkillSwap : P2P Skills Xchange App (Odoo Hackathon 25') **July 2025**

NextJS, ReactJS, TypeScript, Tailwind CSS, ExpressJS, MongoDB, JWT *Github*

- Built a **peer-to-peer skill exchange platform** for offering/requesting skills, setting availability, and finding learning partners.
- Implemented **authentication, profiles, skill search, and filtering** for efficient skill discovery.
- Developed **swap request management** with accept/reject functionality, improving match success by **60%**.

MediCare AI: Smart Patient Healthcare Assistant **June 2025**

TypeScript, React.js, MongoDB, Node.js *GitHub*

- Built a **React.js and TypeScript patient dashboard** to display patient details and medical history through an interactive interface.
- Integrated **MongoDB and backend APIs** for patient registration, authentication, and medical data management.
- Developed reusable **React components** for dynamic data rendering and dashboard interactions.

Achievements/Certifications

- **Engineer's Ring of Honour 2025** **September 2025**
  Achieved All India Rank 470 and College Rank 6 in Round 1 of the competition. Link
- **Career Essentials in Generative AI by Microsoft and LinkedIn** **June 2025**
  Learned generative AI fundamentals, applications and industry use cases. Certificate

Technical Skills

- **Languages**: C, C++, Python, HTML, CSS, Javascript
- **Developer Tools**: VS Code, Git, GitHub, Docker
- **Technologies/Frameworks**: React.js, Flask, Next.js, Express.js, Tailwind CSS, LangChain
- **Databases/AI**: PostgreSQL, MongoDB, Redis, ChromaDB, RAG, Google Gemini, Perplexity

Extracurricular Activities

Career Development Centre **May 2026 – Present**

Placement Secretary *NIT Rourkela*

- Led a **40**-member team coordinating internship and placement activities for **3,000+ students**, while coordinating with **1,000+ companies** for recruitment, scheduling, and communication.
